

Table of Contents

Preface – About Reading this Book	ix
Introduction	1
Part I. Evolution	13
Chapter 1. The Evolution of Evolution	15
Darwinian Evolution	15
Self-Criticism	18
Genetics and Neo-Darwinism	20
Molecular Genetics	21
Evolutionary Developmental Genetics	26
Chapter 2. The Tree of Life	27
Extinctions	31
Tree of Life	32
Horizontal Gene Transfer	34
Preparation for the Cambrian Explosion	35
Chapter 3. The Cambrian Explosion	37
Evolution is Not Directed	44
Part II. Intelligent Answers to Intelligent Design	45
Darwinian Evolution ‘Just a Theory’	46
Chapter 4. Does The Cambrian Explosion Disprove Darwin’s Theory?	49
Gene Duplication and Unequal Crossing Over	
Homeotic Genes	55
HOX Genes	56
How Do the HOX Genes Work?	58
Switches and Evolution	59
Other Homeotic Genes	59
Top-Down versus Bottom –up	60
Lysyloxidase	60
Hemoglobin	61
A Universal Cambrian Genome	61
The Environment	61
Evidence there was Plenty of Time for the Cambrian Explosion	61
Chapter 5. No Intermediate Fossils Anywhere?	65
Speciation by Geographic Isolation	67
Acceleration of Speciation by Diversity	68
Horse Evolution	68
The Burgess Shale	71
Diatoms	72
Mollusks and Species Extinctions	73
Trilobites	74
Sea to Land	75
From Meat Eater to Leaf Eater	76
Chapter 6. Not Enough Time?	79

SNPs and SNMs	80
STRPs and STRMs	81
Microsatellite DNA	81
Implications for Evolution	84
Proof of the Role of STRPs in Evolution	86
The Face of a Dog and Homopeptides of the RUNX2 Gene	86
Darwin's Finches and Rapid Evolution	87
The Role of Gene Splicing and Evolution	88
Other Mechanisms of Rapid Genetic Change	90
Endosymbiosis	90
Whole Genome Duplication	90
Gene Duplication	90
Hybridization	90
Gene Displacement/Gene Opportunism/Coptation	90
Chromosome Rearrangement	91
Horizontal Gene Transfer	91
Jumping Genes	91
Sexual Recombination	91
<i>Alu</i> Sequences	91
Exon Shuffling and Domain Exchange	91
Repetitious Peptides	92
Chapter 7. Complexity – Introduction	95
Complexity and Cellular Automata	96
Computer Models of Evolution – Avida	99
Computer Models of Evolution – EV	101
The Real Thing	102
Monkeys and Typewriters	102
Basic Argument from Improbability	105
Modularity	106
Chapter 8. Complexity – Eyes	109
A Computer Model of the Evolution of the Refractory Index	110
Chapter 9. Complexity – Ears	115
Evolution of the Mammalian Jaw	115
Chapter 10. Complexity – Citric Acid Cycle	119
Chapter 11. Complexity – Blood Clotting	123
Chapter 12. Complexity – Cilia	131
Chapter 13. Complexity – Flagella	137
Chapter 14. Evolution Now: Introduction	145
Definition of a <i>darwin</i>	145
Chapter 15. Evolution Now: The Peppered Moth and Industrial Melanism	147
Attacks on the Peppered Moth Story	151
Defense Against the Attacks	152
Chapter 16. Evolution Now: Darwin's Finches	157
Studies of the Grant's	159
The Drought	160

The Flood	162
Principle of Divergence	162
Speciation by Hybridization	163
Death Knell to Anti-evolutionist	164
The Creationist Anti-evolutionary Spin	164
Chapter 17. The Evolution of Man	167
Lemurs – Our Earliest Ancestors	168
The Human tree	
African Mitochondrial Eve	170
Increase in Brain Size in Human Evolution	172
The Evolution of Brain Complexity	172
Role of specific genes	173
Role of Nutrition	174
Origin of Speech	175
Larynx	175
Brain	175
The <i>FOXP2</i> Gene	176
General Screen for Genes Involved in the Evolution of Man	176
Examination of proteins	177
Examination of mRNA expression	177
Examination of DNA Segments	179
Changes in Promoter Regions	180
Changes in Copy Number	181
Changes in Non-coding RNA	181
Changes in HARs	181
Sex for All Seasons	182
Other Distinguishing Features of <i>Homo sapiens</i>	182
Chapter 18. The Origin of Life	187
The Narrow Origin of Life Window	187
The Miller-Urey Experiment	187
Creationists Objections to the Miller-Urey Experiment	189
There was Virtually No Oxygen in the Early Earth's Atmosphere	190
There was a Hydrogen-rich Early Earth Atmosphere	190
Comets and Meteorites Provide Prebiotic Organic Compounds	190
Hydrothermal Systems	191
Theories of the Origin of Life	191
Protometabolism – A Chemical World	193
The Co-evolution of RNA and Proteins	196
Are We Alone?	199
Chapter 19. Evolution: Conclusions	203
Is Darwinism Poison to Religion?	206
Part III. Cosmology	211
Chapter 20. Quantum Physics	213
Interference	213
Entanglement	220

Is Quantum Weirdness Relevant to Human Spirituality?	223
Chapter 21. The Big Bang	225
The Forces of the Universe	225
Particles of the Universe	227
History of the Big Bang	
Background Micro-radiation	230
Current Version of the Big Bang	231
Inflation and the Speed of Light	234
The Rate of Expansion of the Universe is Accelerating	234
Dark Matter and Dark Energy	235
Black Holes	236
Origin of the Solar System and the Earth	237
Is the Big Bang Relevant to Theology and Human Spirituality?	237
Chapter 22. String Theory: A Cosmic Symphony	239
Strings	239
String Theory	240
M-theory	241
Multiple Universes – Darwinian Selection of Universe	242
Branes, Parallel Universes and Cyclic Cosmology	242
A Universe from Nothing	243
Implications of String Theory for Theology and Spirituality	243
Chapter 23. The Anthropic Principle	245
1. Weak Anthropic Principle (WAP)	245
2. Strong Anthropic Principle (SAP)	246
3. Participatory Anthropic Principle (PAP)	246
4. Final Anthropic Principle	246
What are the Constants that Must be Exactly as they are for Life To Exist?	247
N, ϵ , Ω , λ , Q, D	247
A More Complete List of Anthropic Constants	248
Comments by Various Scientists	250
Strong Selective Effect	
Is Life in the Universe Rare?	251
Religious and Spiritual Implications of the Anthropic Principle	251
Chapter 24. Cosmology and Spirituality	253
1. Quantum Physics	253
Does the Uncertainty Principle Mean We Have Free Will?	253
Does Quantum Physics and Entanglement Support the Eastern Religious View of a Cosmic Consciousness Where All Parts of the Universe are Interconnected?	257
Quantum Physics and Metaphysics	259
2. The Big Bang	259
Is God Required to Stabilize the Universe?	261
3. String Theory	
Does String Theory Eliminate the Theological Advantage of the Big Bang?	262

4. Does the Anthropic Principle Prove that God Exists?	262
The Participatory Anthropic Principle, Human	
Consciousness and the Universe	264
Science and Mysticism	265
Part IV. The Neurology of Reason and Spirituality	269
Chapter 25. Consciousness, the Spirit and the Soul	271
Damasio and Consciousness	272
Edelman and Consciousness	276
Crick and Consciousness	279
Imaging Studies of Subjects in a Persistent Vegetative State	280
Information Integration and Consciousness	281
The Spirit and the Soul	283
Chapter 26. The Frontal Lobes	287
Luria and the Frontal Lobes	291
The Frontal Lobes, Consciousness and Civilization	293
The Frontal Lobes and ADHD	294
The Dorsolateral versus Orbitofrontal Areas	295
The Dorsolateral Syndrome	295
Chapter 27. The Pleasure Brain	299
The Reward Pathways	299
Chapter 28. The Social Brain	305
The Limbic System	305
The Prosocial Hormones Oxytocin and Vasopressin	309
The Orbitofrontal Prefrontal Cortex and the Man Who	
Who Borrowed Cars	312
The “Theory of Mind”	315
The Mirror System	317
Chapter 29. The Rational Brain	323
The Right Brain – Left Brain	324
Novelty versus Routine	325
Working Memory	326
What is Rational Thought?	327
Where is Rational Thought Localized?	328
Brain Imaging Studies	330
Chapter 30. The Spiritual Brain	335
Anatomy of the Temporal Lobe	335
Temporal Lobe Epilepsy (TLE) – History	337
Wilder Penfield and Mapping of the Spiritual Human Brain	338
Stimulation of the Amygdala and Hippocampus	344
More Out of Body Experiences	345
Spiritual and Religious Experiences and Temporal Lobe	
Epilepsy (TLE)	345
Feeling of a Presence	352
The Role of TLE in History and Religion	352
Near Death Experience	356

REM Dreams and the Right Temporal Lobe	364
Magnetic Brain Stimulation of the Temporal Lobes and Spirituality	365
LSD, the Temporal Lobes and Spirituality	367
DMT and Spirituality	369
Psilocybin and Spirituality	374
Right Temporal Lobe or Both Temporal Lobes?	376
Persinger, Temporal Lobe Transients, and the God Experience	378
Speaking in Tongues (Glossolalia)	382
Julian Jaynes, God and the Bicameral Mind	383
The Temporolimbic Marker Model of Saver and Rabin	384
Chapter 31. The Meditating Brain	393
The Types of Meditation	396
Effects of Meditation	400
The Dalai Lama, Compassionate Meditation and <i>Gamma</i> Waves	401
The Effect of Meditation on Brain Function as Determined by Imaging Studies	403
Brain Imaging during Religious and Mystical Experiences	409
Chapter 32. The Hopeful Brain	411
How the Placebo Effects Complicate Drug Studies	414
Pain Pathways	416
Placebo Effect, Pain and Endorphins	418
Placebo Effect and the Prefrontal Cortex	419
Placebo Effect and Acupuncture	421
Placebo, PET and Parkinson's Disease	421
Endorphins, PET and the <i>COMT</i> Gene	422
Nocebo Effect	423
Chapter 33. The Happiness Brain	427
Social Relationships	429
Being in Control	429
Helping Others	430
Chapter 34. The Biology of Faith versus Reason	431
Complex Decisions are made in the Unconscious, Simple Decisions in the Conscious Brain	435
Man's Craving for Information and the Pleasure it Produces	436
Man's Resistance to Changes in His Belief System	439
Chapter 35. Neurology: Summary	443
Part V. The Genetics of Reason and Spirituality	445
Chapter 36. Polygenic Inheritance	447
A Threshold Model	449
How Many Genes?	450
Polygenes	450
Epistasis	451
Chapter 37. The Genetics of Bad Behavior	453
Conduct Disorder (CD) is a Life-long Condition	455

Family Studies of CD	458
Twin Studies of CD	458
Twin Studies of Juvenile Delinquency and Adult Crime	459
Adoption Studies of Antisocial Behavior	460
Adolescence Limited and Life-Course Persistent Antisocial Behavior	461
Some Specific Genes – <i>MAO</i>	463
Chapter 38. The Genetics of Good Behavior	465
Altruism	467
Indirect Reciprocal Altruism and Reputation	468
Strong Reciprocal Altruism, Altruistic Rewarding and Punishing	468
The Genetics of Altruism	469
Unfairness, Emotion and Reason	470
Altruistic Behavior and Dopamine Reward Pathways	471
Altruistic Behavior and Dopamine Genes	471
Chapter 39. The Genetics of Reason	473
Intelligence Tests	473
What is Intelligence?	475
The Genetics of Intelligence	475
Importance of IQ to Success in Society	477
Chapter 40. The Genetics of Spirituality	479
Twin Studies of Religious Belief	480
Twin Studies of Spirituality	485
Twin Studies of <i>Spiritual but not Religious</i>	487
Church Attendance	488
The Role of Specific Genes	489
Part VI. Natural Selection	491
Chapter 41. The Evolution of Intelligence	495
What Parts of the Human Brain have Shown the Greatest Evolutionary Increase in Size?	495
What Cognitive Skills are Unique to Humans?	497
The Time Frame for the Evolution of Human Intelligence	498
The Role of Social Skills in the Evolution of Human Intelligence	500
Chapter 42. The Evolution of Spirituality	503
Is Spirituality a Meme?	505
Spirituality Alleviates Man's Fear of his Own Death, of his Mortality	506
Spirituality Gives Man Control over a Threatening World	508
Spirituality and Near-death Experiences	508
Spirituality, Religion and Societal Cohesiveness	509
Religion and Natural Selection	510
Spirituality as a Defense Mechanism	511
Inborn Spirituality as a Moral Watchdog	511
A Spiritual Mate	512
Part VII. Other Aspects of Spirituality and Reason	515

Chapter 43. The Origins of Religion	517
Animism and the “Primitive Religions”	517
Polytheism	519
Plato, Aristotle and the Ancient Greeks	519
Zoroastrianism	519
The Eastern Religions	
Hinduism	520
Buddhism	522
Jainism	523
Sikhism	523
Taoism	524
The Origins of Monotheism and Judaism	525
The Origins of Christianity	527
Islam	528
Chapter 44. Mysticism	533
Plotinus	534
Kabbalah	534
St. Teresa of Avila	536
Sufi	537
Al-Ghazali	537
Mysticism for the Common Man	539
Chapter 45. Myth and Ritual	541
Myth	541
Ritual	543
Chapter 46. Psychedelics and Religion	545
Psilocybin Mushrooms and Mesoamerica	546
Ayahuasca and the Amazon Basin	550
Mescaline, Peyote and the Native American Church	552
<i>Amanita muscaria</i> , Soma and Hinduism	553
The Soma of Hinduism	556
The Amrita of Buddhism	557
The Soma of Siberia	557
Mushrooms and Western Religion	558
Chapter 47. Does God Play Favorites?	563
The Chosen People	563
The Rapture	564
Chapter 48. The Evils of Religion	569
The Old Testament	568
The New Testament	569
The Inquisitions	570
The Crusades	570
Cromwell’s Slaughter of Catholics	571
The Qur’an and Islam	571
The Assassins	572
Wahhabinism	572
Suicide Bombings and Islam	573

Islam and the Selling of Nuclear Secrets	574
Belief in the Apocalypse	574
Eastern Religions	575
Recent Religious Wars	575
Negative Health Consequences of Religion	576
The Literal Interpretation of Sacred Texts	576
Fundamentalism and Politics	577
Chapter 49. The Benefits of Religion	579
Religion and Health	580
Does Prayer Work?	586
Petitionary Prayer	587
Intercessory Prayer	587
Chapter 50. The Problem of Evil	593
The Gnostics	593
The Deists	594
Theodicy	594
The “Man Created God” Solution	596
Chapter 51. Are the Sacred Books Literally True?	597
Inconsistencies in the Bible	597
Man Made Changes in Sacred Texts	599
Chapter 52. Is God Dead? Ask the Pentecostals	603
Pentecostalism	603
Origins of Pentecostalism	604
Part VIII. Summary: Did Man Make God?	611
Definition of God	610
The Creation Theory	611
The Theory of the Soul	612
The Prayer Theory	612
The Spiritual Brain	612
An Inborn Moral Law	613
Spirituality: An Evolved Trait	614
Other Aspects of Religion and Spirituality	614
Multiple Religions	614
Psychedelics and Religion	614
The Problem of Evil	614
The Inerrancy of the Sacred Books	614
Is God Dead?	615
The Problem of Postponement	615
Is Religion Necessary for a Moral Life?	615
Is Religion Necessary for a Happy, Meaningful or Purposeful Life?	616
How do We Answer the Three Questions of Pope John Paul II?	616
Is Man Inherently Sinful and Evil?	617
Is Science Incompatible with Religion?	618
Is the Rational Brain Incompatible with Spirituality?	619
Is the Rational Brain Incompatible with Religion and Faith?	619

	1. Maximally Compatible	619
	2. Compatible with Minor Qualifications	621
	3. Compatible with Major Qualifications	622
	Spiritual but not Religious	622
	4. Incompatible	622
	Is Religion Doomed or is Science Doomed	623
Glossary		627
Index		640
